Dear Sir,

Re : Installation of Central Vacuum System in Dato Konishi's Residence at Taman
Jesselton

I am happy to write you this testimonial which you had asked for.

I must say it was a hard choice on my part to choose the company to award the above contract to having done so. Even though your pricing was higher compared to others. I am completely satisfied with my decision to award the job to you. It is difficult to come across a company which provides prompt service and having done alterations without additional cost.

It has proven me right to award the contract to a well experience company rather than to a well established company with minimal experience. In my future projects and if there is a need for a central vacuum system, I would highly recommend your company.

I sincerely hope you will provide me with the same quality of installation and prompt service for the second project that I have recently awarded to you.

Lastly I would like to wish you success and keep up the good work.

Yours sincerely

Manager
